DEPARTMENT: GEOSCIENCES

COLLEGE: SCIENCE

RECOMMENDED COURSE IDENTIFICATION:

PREFIX GIS COURSE NUMBER 6028 LAB CODE (L or C) C

(TO OBTAIN A COURSE NUMBER, CONTACT NMALDONADO@FAU.EDU)

COMPLETE COURSE TITLE: PHOTOGRAMMETRY AND AERIAL PHOTOGRAPHY INTERPRETATION

EFFECTIVE DATE

(first term course will be offered)

SPRING 2016

CREDITS²:

3

TEXTBOOK INFORMATION:

WOLF, P.R., AND D.A DEWITT, ELEMENTS OF PHOTOGRAMMETRY: WITH APPLICATIONS IN GIS.

GRADING (SELECT ONLY ONE GRADING OPTION): REGULAR _____ SATISFACTORY/UNSATISFACTORY _____

COURSE DESCRIPTION, NO MORE THAN THREE LINES: THIS COURSE INTRODUCES CONCEPTS, THEORIES AND APPLICATIONS OF PHOTOGRAMMETRY. IT WILL COVER HISTORY, PRINCIPLE, INTERPRETATION, GEOMETRY, STEREOSCOPY OF AERIAL PHOTOGRAPHY, AND FUNDAMENTALS OF ANALYTICAL PHOTOGRAMMETRY.

PREREQUISITES*: NONE

COREQUISITES*: NONE

REGISTRATION CONTROLS (MAJOR, COLLEGE, LEVEL)*:
GRADUATES AT FAU

* PREREQUISITES, COREQUISITES AND REGISTRATION CONTROLS WILL BE ENFORCED FOR ALL COURSE SECTIONS.

MINIMUM QUALIFICATIONS NEEDED TO TEACH THIS COURSE:

MEMBER OF THE GRADUATE FACULTY OF FAU AND HAS A TERMINAL DEGREE IN THE SUBJECT AREA (OR A CLOSELY RELATED FIELD)

Faculty contact, email and complete phone number:

Dr. Caiyun Zhang
 Email: czhang3@fau.edu
 Phone: 561-297-2648

Please consult and list departments that might be affected by the new course and attach comments.³

Department of Civil Engineering

Approved by:

Department Chair: 

College Curriculum Chair: 

College Dean: 

UGPC Chair:  P.R.R.

Graduate College Dean:  STR

UFS President: _____

Provost: _____

Date:

2/5/15

2/5/15

2/5/15

2/18/15 2/25/15

2/26/15

1. Syllabus must be attached; see guidelines for requirements: www.fau.edu/provost/files/course_syllabus.2011.pdf

2. Review Provost Memorandum: Definition of a Credit Hour www.fau.edu/provost/files/Definition_Credit_Hour_Memo_2012.pdf

3. Consent from affected departments (attach if necessary)

Email this form and syllabus to UGPC@fau.edu one week before the University Graduate Programs Committee meeting so that materials may be viewed on the UGPC website prior to the meeting.

GIS 6028C Photogrammetry and Aerial Photography Interpretation (3 Credit Hours)

Syllabus

Florida Atlantic University

Instructor: Dr. Caiyun Zhang

Office: SE 400

Phone: (561) 297-2648

Email: czhang3@fau.edu

Webpage: <http://home.fau.edu/czhang3/web/>

Office hour: Monday, 10:00 AM– 12:00 PM (other times by appointment)

Teaching Assistant: Molly Smith, mmsmit259@my.fau.edu

TA office hour: SE 475, Wednesday and Thursday, 2:00-4:00PM (other times by appointment).

Prerequisite: None.

This course is a mostly/mixing online course. The entire lecture will be offered on-line, but several labs need to be completed at SE 483 Boca campus. Midterm and final exams are provided face-to-face at SE 483.

COURSE DESCRIPTION

This course introduces concepts, theories and applications of photogrammetry. It covers the history, principle, interpretation, geometry, stereoscopy of aerial photography, and fundamentals of analytical photogrammetry. Students will also learn the photogrammetric solutions in ERDAS IMAGINE by completing a series of labs.

COURSE OBJECTIVES

Students will learn basic theories of aerial photography and common applications for remote sensing using vertical aerial photography. After going through the designed lab exercises, students will have skills for aerial photo processing, 3D information extraction, orthophoto production, and digital terrain generation by using current photogrammetric techniques.

COURSE ORGANIZATION

This course is designed as a mostly/mixing online course including lectures, labs, quizzes, and exams. Lectures are completely provided online, labs can be completed online or in SE 483, quizzes need to be completed online, and two exams (midterm and final) are provided face-to-face at SE 483 in Boca campus. A class project is required. The project can be conducted online or at SE 483.

McGlone, J. C., 2013, Manual of Photogrammetry, 6th edition, American Society of Photogrammetry.

Mikhail, E. M., J.S. Bethel, J.C. McGlone, 2001. Introduction to Modern Photogrammetry. Wiley, John & Sons.

Jensen, J. R., 2006, Remote Sensing of Environment: An Earth Resource Perspective (2nd Edition) Prentice Hall, ISBN-10: 0131889508, ISBN-13: 978-0131889507

TENTATIVE LECTURE SCHEDULE, LABS, AND WEEKLY READINGS

Week	Date	Topics, readings, and labs
1	Jan. 5	Overview of the course, Syllabus Introduction to Photogrammetry and Aerial Photography (Chapter 1) <i>Lab 01 Introduction to Blackboard (bonus lab)</i>
2	Jan. 12	Principles of Photography and Imaging (Chapters 2 & 3) <i>Lab 02 Introduction to ERDAS IMAGINE</i>
3	Jan. 19	<i>M.L. King Holiday, no class this week</i>
4	Jan. 26	Elements of Aerial Photo Interpretation (handout) <i>Lab 03 Visual Image Interpretation in ArcGIS</i>
5	Feb. 2	Vertical Aerial Photography (Chapter 6) <i>Lab 04 Scaling Aerial Photographs (Calculation)</i>
6	Feb. 9	Tilted Aerial Photography (Chapter 10) <i>Lab 05 Digital Image Rectification in ERDAS IMAGINE</i>
7	Feb. 16	Making Metric Determinations from Aerial Photos (Chapter 4)
8	Feb. 23	Midterm Exam/Quiz 1 (on campus meet SE 483 at 6:30PM)
9	Mar. 2	<i>Spring Break, no class</i>
10	Mar. 9	Stereoscopic Viewing and Parallax I (Chapters 7&8) <i>Lab 06 Introduction to Stereo Analyst for ERDAS IMAGINE</i>
11	Mar. 16	Stereoscopic Viewing and Parallax II (Chapter 7&8) <i>Lab 07 Checking the Accuracy of a DSM and Measuring 3D Information in Stereo Analyst</i>
12	Mar. 23	Analytical Photogrammetry I (Chapters 11&17) <i>Lab 08 Introduction to Leica Photogrammetry Suite (LPS)</i>
13	Mar. 30	Analytical Photogrammetry II (Chapter 11&17) <i>Lab 09 Automatic Terrain Extraction in LPS</i>
14	Apr. 6	<i>AAG Conference, No Class</i>
15	Apr. 13	LiDAR Remote Sensing <i>Lab 10 Digital Surface Model and Digital Terrain Model Generation from LiDAR</i>
16	Apr. 20	Aerial Photography Project Planning (Chapter 18)
17	Apr. 27	Final Exam/Quiz 2 (on campus meet, SE 483 at 6:30PM) Final Project due on Apr. 28 at 11:59 PM

GRADING POLICY

The final grade in the course will come from the class attendance, laboratory exercises, midterm and the final exams. The total average grade for the laboratory exercises constitutes 40% of the final course grade. The class attendance, midterm exam and final project will count 10%, 25%, and 25%, respectively, towards the final course grade.

Points	Final Grade
94 - 100	A
90 - 93	A-
87 - 89	B+
84 - 86	B
80 - 83	B-
77 - 79	C+
74 - 76	C
70 - 73	C-
67 - 69	D+
64 - 66	D
60 - 63	D-
59 or lower	F
Course Components	% of Final Grade
Lab Exercises	30%
Midterm Exam	20%
Final Exam	20%
Quiz	10%
Final Project	20%

LATE PROJECTS/LAB EXERCISES

10% off per day late, including weekends, rigidly enforced.

COURSE MATERIALS IN BLACKBOARD

All course materials are loaded in Blackboard, and lab required data files are located in "G:\CourseMaterial\GIS 4021c & GEO 6938 Photogrammetry and Aerial Photography Interpretation". In the Blackboard, course related information is organized in the following areas:

- **My Instructor:** the instructor's information including office hour, office, phone, etc.
- **Syllabus and Schedule:** course syllabus, schedule, and grading, etc.
- **Learning Units:** lecture notes, videos, and all related references are uploaded and organized as units under this category; Lab instruction and assignments are also loaded here; Midterm and final project instruction and requirement are also loaded here.
- **Student Submissions:** Note that 50% of the course grade comes from successfully completing these labs in a timely manner; students need to submit their assignment in PDF format and keep the original work at G temp drive. Final project report should be submitted here too. Quizzes are also distributed here.
- **Manuals:** Free relevant materials are uploaded here.
- **Discussions:** Course related questions and discussion are posted here.

COMMUNICATION

All course related issues are communicated through the Discussion Board and Email function in the Blackboard. For the Discussion Board, General Questions and Answers (FAQ) will be posted by the Instructor. All other related questions can be posted in the Discussion Board such as questions, discussions, and ancillary information to complete labs, and helpful hints. It takes about 3 days to reply your questions. Note that all course communications, whether with fellow students or the instructor, should be respectful and relevant to the course. Think of the online course space as being similar to a conference room at your place of employment where you are communicating with co-workers and supervisors. If your posts and messages are not appropriate in that environment, they are not appropriate in the course space either.

SUPPORTIVE RESOURCES

- **Campus Supports**

- **FAU eLearning Resources**

- Center for Learning and Student Success (CLASS) (<http://www.fau.edu/class/>): CLASS at FAU offers a dedicated eLearning Advisor, Eduardo Santiago (email: esantia5@fau.edu), who is available to help you with any fundamental issues related to eLearning, technology with online courses, and with your effort to achieve success in the online environment (www.fau.edu/esuccess)
 - FAU Library (www.fau.edu/library): The library at FAU is an essential resource for the students. The library provides a number of online resources to assist you with your assignments in the course. On the home page is the SearchWise search engine with flexible functionality to assist you in finding resources. Also on the home page, you will find links to LibGuides, one of which is for Geography. You can also access the libraries online collections by using the off campus EZproxy system.

- **FAU's Online Computing Support Center**: The center allows you to search the Knowledge Base for answers to common questions. Submit your own help ticket by clicking on "Submit a ticket". If the Blackboard server is not available at night or on the weekend, please contact the FAU Help Desk at 561-297-3999.

- **Department Supports**

- **Department of Geosciences Help Desk**: this help desk provides support for the Geosciences remote applications as well as the Department's network drives (e.g., student G: drive). Submit your own help request via e-mail to GeoHelpDesk@fau.edu.
 - **Department of Geosciences Resources** for this course: There are two computer teaching labs (SE 457 and SE 483 at Boca Raton campus) available exclusively for students taking Geosciences courses requiring the use of these labs. Labs are departmentally supported and not open to the general university student body. Systems are available on a first come first serve basis when a scheduled class does not occupy the room. For more department resources, you can visit website <http://www.geosciences.fau.edu/computer.html>
 - **G:\SemesterTempDrive**: For this course, students will use this drive to finish their labs and related homework. This is a temporary storage space for the general student body to keep course work for one semester (120 days). Permissions are set to prevent access by other students. However, department faculty and graduate students have

read access to these directories. There is a 4GB disk space limit. Any files older than 120 days are automatically deleted.

- **Department Software support:** Geosciences' students may access most of our department software applications from off campus using our Citrix hosted cloud application. Systems are found at <http://geoportal.fau.edu>.

POLICIES

Lab Policy: Most labs will become available Mondays at 5 PM and will be closed on Mondays at 11:59 PM. Be sure to check the syllabus each week as some labs dates are scheduled to accommodate for larger assignments. Please make all efforts to complete and submit labs assignments via BlackBoard Assignments by 11:59 PM on the due date. If this time is passed, Blackboard (BB) will accept your assignment; however, it will be considered late and a late penalty will apply of a 10% reduction in grade per day. Labs are only accepted via Blackboard Assignments. After ten days, the lab is worth zero points. "F" Grade if original work files are not saved in the G drive folder to support lab. You will get 10% deduction of points for omission or wrong path location. All work must be your original work, not a copy of group or team project you did with someone else.

Technical Policy: Thousands of students have successfully used our online system for distance learning. However, should a student experience technical difficulties if remotely accessing the course from home or other locations outside the Geosciences Lab, it is up to each student to solve their own technical issues such as internet access. Note that all the labs are only tested under Windows Operation System. Labs may not work under other operation systems.

Incomplete Grades Policy: Incomplete are awarded only under extreme circumstances at the discretion of the instructor. The University policy is that candidates for an Incomplete Grade must have extreme circumstances that hinder the completion of the course AND must be passing the course at the time of the occurrence of the extreme circumstance.

Make-up Policy: Even though there is some flexibility in the learning pace in online courses, graded labs and exams will be time dependent and the deadlines must be observed. Late assignments will be accepted, and make-up labs and exams will only be given for a verifiable excuse with documentation. Lack of documentation will result in a zero. Make-up labs and exams will be scheduled at the instructor's discretion and may not be of the same format. Reasonable accommodation will be made for religious observances, scholastic, athletic, or other FAU approved events and prior arrangements must be made with the instructor before the conflict occurs.

General Policy at FAU: Each student is expected to follow and conform to the rules and regulations identified in the Florida Atlantic University 2013 -2014 graduate Catalog.

Disability Policy at FAU: *In compliance with the Americans with Disabilities Act (ADA), students who, due to a disability, require special accommodation to properly execute course work must register with the Office for Students with Disabilities (OSD) -- in Boca Raton, SU 133 (561-297-3880); in Davie, LA 240 (954-236-1222); in Jupiter, SR 110 (561-799-8010) -- and follow all OSD procedures.*

Academic Integrity Policy at FAU: *Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the University mission to provide a high quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the University community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see the Code of Academic Integrity in the University Regulations:*

http://www.fau.edu/ctl/4.001_Code_of_Academic_Integrity.pdf
