Integrative Biology Degree Requirements

Doctoral degrees at FAU require at least 80 credits beyond the baccalaureate degree. The following are specific requirements of the program in Integrative Biology.

1. The Integrative Biology Ph.D. program is research-intensive. The 80 minimum post-baccalaureate credits required to complete the program will include a minimum of 18 credits of coursework with a cumulative grade point average of 3.0 or higher with the following requirements:

a. Of the 18 required coursework credits, 9-to-10 credits (three courses) will be in courses designated as core courses; the core requirements include:

Integrative Biology 1, BSC 6390, 3 credits

Scientific Communication, BSC 6846, 3 credits

One course in statistics (students may fulfill the statistics core requirements by completing:

Experimental Design and Biometry (PCB 6456), 3 credits

Experimental Design 1, PSY 6206, 3 credits

b. The remainder of the 18 credits will include elective courses that support the student's research plan. The student's Ph.D. supervisor and the supervisory committee must approve all elective courses;

c. The elective courses must be 5000-, 6000- or 7000-level courses in biology, biomedical science, psychology, complex systems and brain sciences, geoscience, urban and regional planning, chemistry or approved cognates. Students participating in an Integrative Biology concentration must select from graduate-level elective courses related to the specific concentration (see the elective lists below for the IBNS and IBES). *The lists of track-specific elective courses below are not exclusive and the selection of elective courses to meet degree requirements will be determined by consultation between the student and the Ph.D. supervisor and/or the student's advisory committee.*

d. Courses designated as proficiency or remedial (4000-level and below) may not be used to satisfy the course requirement.

2. Students must enroll in three seminar/journal club courses offered by the program prior to graduation. A seminar course is considered to be one based on student participation in activities, such as student presentations or student/faculty-led discussions of relevant topics.

3. Dissertation research under the direction of the student's dissertation research committee.

4. A minimum of 25 credits of doctoral dissertation.

5. Admission to candidacy follows successful defense of a dissertation research proposal. The defense of the dissertation will be held with the student's dissertation research committee.

6. Public presentation of the dissertation research.

The degree requirements listed above apply to all Integrative Biology program participants. Concentration-specific requirements are described below.

Neuroscience Concentration (IBNS) Prerequisites and Electives

IBNS Prerequisites

Students who enter the IBNS concentration with no prior neuroscience coursework must take two of the following five courses. Completion of these courses may be used toward fulfillment of the 9-credit Integrative Biology elective requirement.

| | | |
|--|-----------|---|
| Cellular and Molecular Neuroscience Neuroscience-1 | PSB 6345 | 3 |
| Systems and Integrative Neuroscience Neuroscience-2 | PSB 6346 | 3 |
| Practical Cell Neuroscience | BSC 6417C | 3 |

| | | |
|------------------------------|-----------|---|
| Neurophysiology | PCB 6835C | 3 |
| Advanced Neurophysiology Lab | PCB 6837L | 3 |

IBNS Electives

Students enrolled in the IBNS concentration must select graduate-level elective courses that are relevant to the field of neuroscience. When these courses are completed, they may be used toward fulfillment of the 9-credit Integrative Biology elective requirement. See the electives table below.

| | | |
|---|-----------|---|
| General Neuroscience | | |
| Cellular and Molecular Neuroscience <i>Neuroscience 1</i> | PSB 6345 | 3 |
| Systems and Integrative Neuroscience <i>Neuroscience 2</i> | PSB 6346 | 3 |
| Molecular and Cellular Neuroscience | | |
| Advanced Cell Physiology | PCB 6207 | 3 |
| Developmental Neurobiology | PSB 6515 | 3 |
| Brain Diseases: Mechanisms and Therapy | BMS 6736 | 3 |
| Cellular Neuroscience and Disease | PCB 6849 | 3 |
| Practical Cell Neuroscience | BSC 6417C | 3 |
| Autonomic Function and Diseases | BMS 6523 | 3 |
| Neurophysiology | PCB 6835C | 3 |
| Advanced Neurophysiology Lab | PCB 6837L | 3 |
| Human Neuroanatomy | ZOO 6748 | 3 |
| Behavioral Neuroscience | | |
| Seminar in Behavioral Neuroscience | PSB 6058 | 3 |
| Developmental Neuropsychology | PSB 6516 | 4 |
| Principles of Neuroscience | PSB 6037 | 3 |
| Cognitive Neuroscience | | |
| Cognitive Neuroscience | ISC 5465 | 3 |
| Seminar in Cognition | EXP 6609 | 3 |
| Seminar in Human Perception | EXP 6208 | 3 |
| Theoretical and Dynamical Neuroscience | | |
| Computational Neuroscience 1 | ISC 6460 | 3 |
| Bioinformatics | BSC 6458C | 4 |
| Bioinformatics: Engineering Perspectives | BME 6762 | 3 |
